Your Very Nice Project Title

Author Name, Author Name, Author Name

The University of Texas at Austin

{eid1,eid2,eid3}@eid.utexas.edu

1 Introduction

Please provide an overview of: (1) what research problem you or your team is trying to answer; (2) why this problem is important; (3) how you plan to address it (please focus on the high-level idea/insight and save details for Section 4).

2 Background

The necessary background to understand your project. Even if the background information is covered by one of the lectures, please still briefly discuss it here in your own words and/or figures.

3 Threat Model

Describe your threat model. This is required for offensive and defensive projects, and optional for survey and measurement projects.

4 Proposed Approaches

Outline your proposed approaches.

Evaluation Plan Describe how you plan to evaluate your idea.

Required Equipment/Resources Do you need any special equipment or resources (e.g., access to a certain CPU model or computational resources)?

Team Composition List your team members and describe how you plan to distribute tasks among them.

Questions for the Instructor List any aspects you are uncertain about and would like guidance from the instructor on.
